

## Materials:

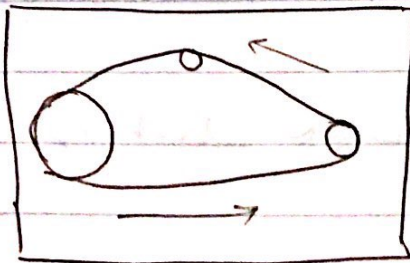

- Wood base.
- Pulley / stepper motor system.
- servo motor.
- Some sort of linkage.
- Bell.  ?

\* I'm motivated to create something with sound.  
(not sure tho)

- I want to use the servo motor to ~~just~~ hit the bell.

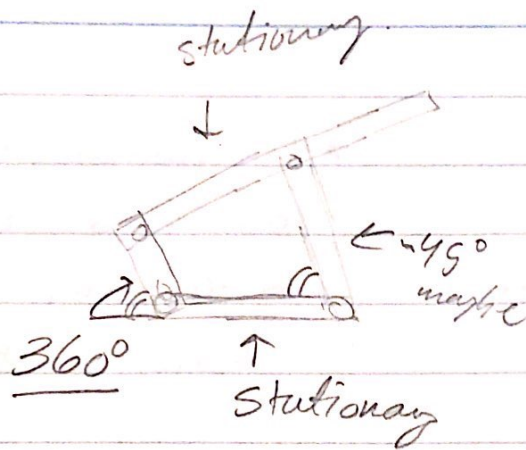

- I want the stepper motor system to also create some sort of sound, but I'm not sure how.

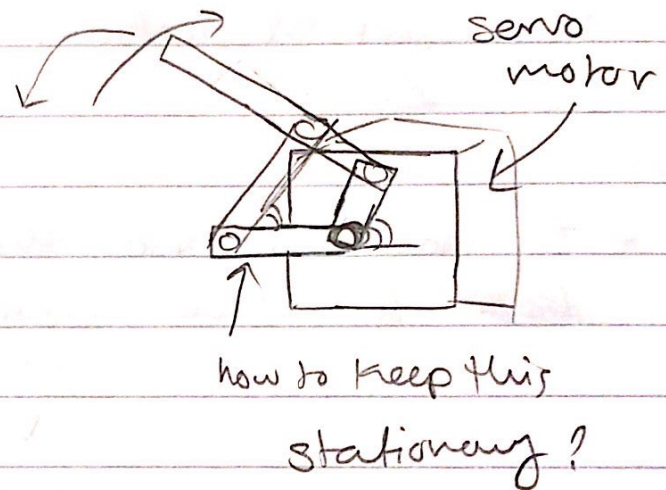

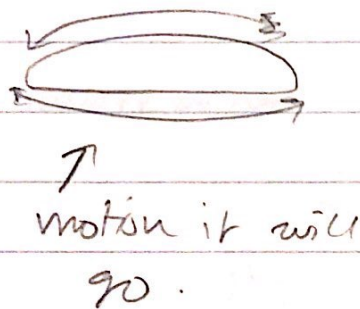

\* Maybe, I can attach something on the belt, and everytime it rotates, it hits something?

\* But I feel like my project lacks creativity and doesn't utilize the drives.

← let's try to use this linkage.

\* I have the servo motor sorted out, I don't know what to do with the stepper motor.

\* I'm not sure what ~~kind of~~ ~~to~~ ~~create~~ ~~the~~ ~~add~~ add in terms of design and creativity.

I guess I'll think about it later.
